GSP XTV AXLES

**ALL POPULAR MODELS IN STOCK THROUGH MAVERICK,
CANADA'S EXCLUSIVE DISTRIBUTOR**

If you're in the market for a heavy-duty axle you can trust, you've come to the right place. GSP's XTV axle line is the perfect choice for UTV and ATV owners and enthusiasts who put performance and reliability first and foremost.

That's a bold claim. At GSP we back it up with over 30 years of CV manufacturing experience. Founded in 1985, GSP Automotive Group is the leading manufacturer for automotive driveline components for the worldwide aftermarket. GSP produces drive shafts, CV joint kits, hub assemblies, wheel bearings and rubber-to-metal components, supplying OEM and aftermarket customers in over 120 countries.

GSP North America was established in 2004 with the specific mission of supplying high-quality CV axles to the growing UTV and ATV market. Today we make over 300,000 axles annually for the OEM and UTV/ATV aftermarket. Our engineers are working hard to keep pace with this explosive market. We have over 200 part numbers available, including our acclaimed Xtrem Duty XD CV axles specifically engineered for lifted UTV, ATV and SXS applications.

The GSP HD line is the natural upgrade from OEM axles, featuring OEM fitment with heavier duty components to offer enhanced durability. From the materials we use to the grease we apply, everything about the HD line's axles are engineered to withstand the rigors of extreme environments and applications.

- > Oversized Heavy-Duty 4340 chromoly steel shafts increase strength by over 15%.
- > Oversized Outer Joints have a swing angle of up to 50° providing increased suspension travel and strength.
- > By using advanced engineering and the latest CNC machines, we are able to achieve a maximum swing angle of up to 45° on our Inner Joints.
- > Advanced CV Joint ball groove grinding methods ensure the smoothest, longest lasting finish by reducing friction and wear.
- > Many of our axles come with high strength and long lasting TPE boots that perform better and last longer in extreme environments.
- > Heavy duty Oetiker clamp for improved strength and durability.
- > Our XTV axles use high performance moly grease, designed to excel in extreme condition
